

Melih Koç

I am a third year student at Ostim Technical University, Software Engineering (English) department. I have focused on continuously improving myself in the field of software development and have mastered many modern technologies in this process. On the front-end side, I have developed projects with React.js, Next.js, Vue.js and Tailwind. On the back-end side, I have developed various applications using Spring Boot, Node.js, Express.js and Laravel.

Work Experience

Intern Software Developer

Aug 2024 - Oct 2024

Yosun İleri Teknoloji - Ankara

- I developed websites for individuals and companies.
- I carried out frontend developments with Next.js and backend processes using Express.js.
- I performed database configuration and management with MongoDB.
- I completed and delivered projects by taking responsibility from beginning to end.

Full-Stack Developer (Remote)

Nov 2024 - Present

Galaktik Yazılım - Ankara

- Actively involved in developing customized CRM application for a large enterprise company using Laravel and Vue.js.
- I designed dynamic and user-friendly interfaces with Vue.js in the frontend part of the application.
- By managing backend processes with Laravel, I performed critical tasks such as API development, database operations and server configurations.
- I took part in every stage of the project and successfully managed the development, testing and distribution processes.
- I aim to take part in similar large-scale applications and in-house projects in the future.
